Effects

# Animated

## Bass Distortion

### Introduction

Turn your bass tone into a monster with the *Crowella Effects Animated*, a high-gain, face ripping distortion designed to eliminate the guitar from any band. This is the original clone of the Human Gear Animato.

Each one is tuned to match the original and features a clean blend and an internal gate control to maximise the impact of your bass tone.

## **Controls**

**Gain** - Control your input gain to go from subtle drive to distorted.

**Tone** - Dials in your tone from removing treble to adding bite.

**Blend** - Blends between a dry signal (unaffected signal at unity gain) and a wet signal (full effect).

**Volume** - Sets the output level of the distorted signal.

# Specifications

## Dimensions and Weight

Width: 68mm

Height: 114mm

Depth: 49mm

Weight: 219g

## Technical Specifications

Input Impedance:  $1\text{M}\Omega$

Output Impedance:  $2\text{k}\Omega$

Current Draw: 7mA

Voltage: 9V DC (Centre Negative 2.1mm)

## Switching

True bypass with LED indicator.

## Power

**Uses standard 9V center-negative plug power adapters ONLY. Improper supply may cause internal issues and may permanently damage your unit!**

No battery clip provided.

## **Warranty**

All products are covered under warranty and are subject to Australian consumer laws. View our warranty information by visiting *<http://www.crowella.org/warranty>* for further information.

## **Disclaimer**

All specifications listed, inclusive of both internal and external representations of products and specifications are subject to change at short notice.

For further information and support, you can either visit *<http://www.crowella.org>* or contact *[support@crowella.org](mailto:support@crowella.org)*

The manufacturer claims that the product fulfils the following requirements set by RoHS, WEEE.
